HL7 PHIR PCs	Data Model	It might be helpful for the Pharmacogenomics group to review the work on these PHIR standards. http://build.fhir.org/ig/HL7/genomics-reporting/pharmacogenomics.html https://build.fhir.org/ig/HL7/genomics-reporting/profiles.html https://hl7.org/fhir/uv/genomics-reporting/STU2/scenarios.html I'm not sure, however, if they have been tested anywhere. Leverage some existing modelling			Grant Wood

ENUM NAME	ENUM VALUES	VALUE DEFINITION/EXAMPLES	NOTES/COMMENTS
Resource Type	Initiative	A organization or initiative conducting relevant or similar work in genomics quality control	
Resource Type	Data Model	Community standard providing a model for representation of data (use cases may include data collection, integration, reasoning, or exchange, etc (e.g. GA4GH-G2P, FHIR).	
Resource Type	API	e.g. Beacon, Search	
Resource Type	Terminology / Identifier System	Community standard that provides a set of terms, codes, or identifiers for concepts in the domain (e.g. GenEpiO). Sources of identifiers/codes for concepts, not patterns/schema for representing data.	
Resource Type	Application / Knowledgebase	A knoweldge resource or application that may use its own data model and/or community standards	
Resource Type	Other (enter new type)	If the resource doesnt fit the aboove types, add new type here.
